

Construction of upgrades and improvements to the Belleville Water Distribution System, consisting of the project entitled Lead Service Line Replacement Program, Phase 1, with a construction cost of \$1,804,700.75 are being financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits with the replacement of lead service lines with copper for residents and businesses in immediate vicinity of the Newark Reservoir on Joralemon Street.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
